

I submitted my name to the Indiana Do Not Call list to prevent all of these annoying phone calls. I am tired of being interrupted at home to answer these telemarketing calls. I do not want to talk to these individuals and it is unfair that they want to bother me. These are unsolicited calls and I do not want them. It makes me very irritated that they want to relax this law. It was the best thing that was done for private citizens in years and they need to respect our rights!
